To Whom It May Concern:

Honeywell has submitted an application to the New Jersey Department of Environmental Protection (NJDEP) for an Individual Waterfront Development Permit under the Coastal Permitting Rules. The permit would allow us to implement a remedy for a portion of the riverbed of the Hackensack River near the former Roosevelt Drive-in site along Route 440 in Jersey City.

The remedy, which will be done under the supervision of the federal court, is expected to begin in June 2011. The work will involve a small amount of dredging, capping of portions of the river bottom, and long-term monitoring of the completed remedy. The construction equipment for the remedy will be mounted on barges, with some staging of equipment on land at the site.

You are receiving this letter now as part of the permit application notification requirements. Honeywell will host a public information meeting in early spring 2011 to outline the details of the remedy. You and your neighbors will be notified of this meeting.

Copies of the application form and site location map are enclosed. Additional technical details can be reviewed at either the Jersey City Municipal Clerk's Office or by appointment at NJDEP's Trenton office. The NJDEP and Honeywell welcome comments and any information that you would like to provide. Please submit your written comments within 15 days of receiving this letter to:
