**Subject: Annual Notice to Stakeholders/Utilities
SA-5 Consent Decrees**

This letter documents Honeywell's compliance with the obligation to provide an annual update notice to New Jersey One Call and other underground alert hotlines regarding site conditions and activities at Site 079 (Ciasulli Property), pursuant to paragraph 81 of the Consent Decree Regarding Site 79 and 153 South. Based on our review, New Jersey One Call is the appropriate underground utility hotline in New Jersey. We are also sending annual notification letters to the individual utility companies with services in the area of the Study Area 5 sites as an additional measure to ensure utility notification.

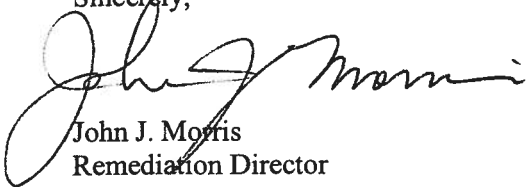

On October 28, 2010, Honeywell provided initial notice letters to stakeholders, including utility entities, with information about the Ciasulli Property. By letter dated October 24, 2011, Honeywell is providing annual updated notification regarding site conditions and activities to stakeholders including utility entities, in accordance with the requirements of the Consent Decree. Copies of the notification letters are attached for reference.

Honeywell provided annual utility notice letters for the other Study Area 5 sites, the former Morris Canal and the New Jersey City University (NJCU) property, on April 21, 2011. Starting in 2012, Honeywell anticipates coordinating the submittal of the annual utility notice letters for the Ciasulli Property with the other Study Area 5 sites, so all of these notice letters will be sent in April.

Additionally, Honeywell is posting an annual updated summary of the chromium remedial actions via a web site, as specified in paragraph 81 of the Consent Decree Regarding Site 79 and 153 South and paragraph 104 of the Consent Decree Regarding Remediation of the New Jersey City University Redevelopment Area. In cooperation with NJCU, Honeywell has set up a web site for the NJCU remediation project and will use this site to provide information on the status of the chromium remedial actions. Honeywell will post a copy of the attached notification letters on the NJCU remediation web site (www.NJCU.siteremediation.com).

If you have any questions, please feel free to call me at 973-455-4003.

Sincerely,

John J. Morris
Remediation Director
